

```
public class ValidateConstraintsHandler extends AbstractHandler {

    @Override
    public Object execute(ExecutionEvent event) throws ExecutionException {

        // Invoke the window that will read the specialization file
        Shell s= new Shell();
        FileDialog dialog = new FileDialog(s);
        dialog.setText("Enter the specialization xmi file");
        dialog.setFilterExtensions(new String[] { "*.xmi" });
        String selected = dialog.open(); // selected has the route of the file
    }
}
```
